

New pieces for B 109 Torpodoboot.

1. Torpedo (Mk. G7 - 21“)
2. Carriage for Torpedo (75 % completed)
3. Underbody of 8.8-cm-SK/L45 C/13 to increase height over deck.
4. Boardcase with signalflags
5. Night Rudder-Speed-recognition gear (the „wheel“) on rear deckhouse

The revision of bridge after appr. 2 hours.

What you cannot see here is, that the bridge has on the downside the complete supporting structures

Also note the new vents at mid-funnel. Finally I can say: Never revise a model – build a new one, because its nearly the same...

Rear deckhouse at a viewing distance of appr. 3 inches. One will never get that close later due to the rigging.
